

# Kusumeshkant Sharma

Senior Flutter Developer · AI Agent Architect

+91-8884133322 · kusumeshkantsharma@gmail.com · linkedin.com/in/kusumeshkantsharma/ · Bangalore · Open to Remote

## PROFESSIONAL SUMMARY

Senior Flutter Developer with 5+ years delivering production-grade cross-platform iOS/Android apps — Clean Architecture, Riverpod, BLoC, GraphQL, and real-time integrations across fintech, fitness, and e-commerce. Also a builder at the AI layer: designed and shipped a hierarchical 8-agent AI orchestration system (Anthropic SDK, Claude API) to autonomously operate a B2B SaaS business — replacing Sales, Revenue, Customer Success, Product, and Engineering functions at ~\$0.002/run — and architected a mobile-first human-in-the-loop console (Flutter + Supabase) that lets operators approve AI-agent actions from anywhere. Experienced in owning full product pipelines from mobile UI to backend to AI infrastructure.

## TECHNICAL SKILLS

|               |                                                                                                                            |
|---------------|----------------------------------------------------------------------------------------------------------------------------|
| Mobile        | Flutter, Dart, FlutterFlow, Android Studio, Xcode (iOS)                                                                    |
| State Mgmt    | Riverpod, BLoC/Cubit, GetX, Provider, Redux                                                                                |
| Architecture  | Clean Architecture, MVVM, SOLID, Dependency Injection                                                                      |
| APIs & Auth   | REST APIs, GraphQL, OAuth 2.0, Dio (interceptor-level encryption), Firebase SDK                                            |
| Cloud & CI/CD | Firebase (Auth, Firestore, FCM, Analytics), Supabase (Postgres, Auth, Edge Functions), AWS S3, GitHub Actions, CI/CD       |
| AI & Agents   | Anthropic SDK, Claude API (Sonnet/Haiku), Multi-Agent Orchestration, Langfuse, Ingest, Docker Compose, Prometheus, Grafana |
| Other         | React.js, Node.js, Express.js, MongoDB · Figma, Postman, Jira, Confluence                                                  |

## PROFESSIONAL EXPERIENCE

- Sr. Software Developer (Flutter)** · *Apto Solutions* · *Chennai*

Sept 2025 – March 2026

**Selfe Loans — Equitas Small Finance Bank · Play Store Live**

- Architected Flutter app using Riverpod + MVVM with strict Clean Architecture layering, decoupling team responsibilities and accelerating feature delivery across 900+ branch integrations India-wide
  - Engineered modular Dio-based API client with interceptor-level request/response encryption; integrated Firebase Analytics + Netcore for funnel tracking and push notification campaigns
  - Implemented end-to-end user onboarding flows (KYC, document upload, real-time status tracking) and owned App Store + Play Store deployment pipeline
- Sr. Software Developer (Flutter)** · *Joola India Pvt. Ltd* · *Bangalore*

Sept 2024 – Apr 2025

- Led Flutter development for 150+ Health (Play Store) — fitness app with smartwatch integration via Google Health Connect (Android) and Apple HealthKit (iOS) for automated activity sync
  - Mentored junior developers on Clean Architecture and state management; conducted code reviews enforcing best practices across the mobile codebase
  - Built Node.js / Express.js / MongoDB backend for analytics and content delivery; architected React.js frontend for RacketPro (racketpro.org) using Redux
- Software Developer** · *Joulestowatts BS Pvt. Ltd* · *Bangalore*

Nov 2023 – Apr 2024

- Delivered complete checkout module for EE e-commerce app (UK, Play Store) — cart, address, payment integration, order confirmation — using Flutter + BLoC + Clean Architecture
  - Integrated GraphQL APIs with TDD documentation; applied SOLID principles across all feature modules for testability and maintainability
- Software Developer** · *StillsWeb* · *Mumbai · Remote*

Feb 2022 – Oct 2023

- Developed and shipped Flutter applications including StillsWeb (cloud photo gallery) and Srajan AI on Play Store; built Unsync — a real-time video/audio/text communication platform using Firebase + WebRTC
  - Built scalable backend services using Node.js, Express.js, and MongoDB; integrated AWS S3 with role-based folder permissions (10GB/user) and Hive for offline-first persistence
  - Developed responsive admin and web interfaces using React.js; delivered pixel-perfect Figma-to-Flutter UIs with optimized performance and clean architecture
- Technical Engineer** · *Concentrix* · *Bangalore*

Jun 2020 – Sep 2021

- L1/L2 technical support for enterprise clients — diagnosed application and hardware issues, improving first-call resolution rates

## KEY PROJECTS

---

### DQ AI Agent Orchestrator — Founder · Personal Project · 2026

[Node.js](#) · [TypeScript](#) · [Anthropic SDK](#) · [Claude API \(Sonnet 4.6 / Haiku 4.5\)](#) · [Langfuse](#) · [Ingest](#) · [Docker Compose](#) · [Prometheus](#) · [Grafana](#)

- ▶ Architected hierarchical 8-agent orchestration: ORACLE (Claude Sonnet 4.6) as master orchestrator synthesizing outputs from 7 concurrent domain-specialist agents (Claude Haiku 4.5) — Revenue, Sales Pipeline, Churn Prevention, Customer Success, Product Intelligence, Growth, and Platform Engineering
- ▶ Implemented raw Anthropic SDK tool-use agentic loops with Promise.all() parallel execution; ORACLE synthesizes a daily brief with 15–20 prioritized action items covering MRR, trial pipeline, churn risk, and platform health
- ▶ Engineered full observability stack (Langfuse self-hosted, Prometheus, Grafana, Jaeger, Loki, OTel Collector) via Docker Compose — every LLM call traced at per-agent resolution for latency, token usage, and cost visibility
- ▶ Achieved ~\$0.002 per full run via deliberate model tiering (Sonnet 4.6 for synthesis, Haiku 4.5 for specialist workloads); Ingest 8AM cron for autonomous daily execution; Express.js API for per-agent manual triggers

### Cockpit — AI Agent Approval Console — Founder · Personal Project · In Development, 2026

[Flutter](#) · [Dart](#) · [Riverpod](#) · [get\\_it/injectable](#) · [go\\_router](#) · [Supabase \(Postgres, Auth, Edge Functions\)](#) · [Firebase Cloud Messaging](#) · [HMAC](#)

- ▶ Architected a mobile-first, human-in-the-loop control app for AI agent automations (n8n / Make / Zapier / custom agents) — Flutter/Dart client with feature-first Clean Architecture, Riverpod state management, and typed Either<Failure,T> error handling
- ▶ Designed the Supabase backend: Postgres schema with row-level security and transactional Edge Functions (agents-create, actions-inbound, actions-decision) enforcing HMAC-signed inbound webhooks, pre-push persistence, and idempotent decision handling
- ▶ Built the end-to-end approval loop — signed webhook → FCM push → one-tap approve/edit/reject → authenticated callback to the originating agent — backed by an append-only audit trail with Realtime sync and polling fallback
- ▶ Currently wiring the Flutter client to the live Supabase stack (Auth, Realtime, Edge Functions), transitioning off demo datasources toward a testable end-to-end MVP

### Selfe Loans

[Flutter](#) · [Riverpod](#) · [Dio](#) · [Firebase](#) · [REST APIs](#)

Production platform with 900+ integrations, KYC flows, encrypted API client, real-time status tracking. Play Store live.

### 150+ Health

[Flutter](#) · [Node.js](#) · [Google Fit](#) · [Apple Health](#) · [Firebase](#)

Cross-platform fitness app — smartwatch sync, personalized video content, Google Maps court discovery. Play Store live.

### EE E-Commerce App (UK)

[Flutter](#) · [BLoC](#) · [GraphQL](#) · [Dio](#) · [Clean Architecture](#)

Full checkout module — cart, address, payment, order confirmation with GraphQL APIs and TDD-backed modules.

### StillsWeb · Srajan AI · Unsync

[Flutter](#) · [AWS S3](#) · [Firebase](#) · [GetX](#) · [WebRTC](#) · [Hive](#)

Cloud gallery (10GB/user, RBAC), AI extension, real-time video/audio/text communication app. All Play Store live.

## EDUCATION

---

**B.E. — Mechanical Engineering** · *Tagore Engineering College, Anna University, Chennai*

2014 – 2018
